a. **mandatory** b. **bankruptcy** c. **universal** d. **premium**

1. inability to pay all one's debts when they are due
2. required
3. payment for insurance
4. available to all

1 with bankruptcy

2 with mandatory

3 with premium

4 with universal

B. **Answer the following in complete sentences:**

1. Explain what **insurance** is and how it works

Insurance is a type of thing companys give out and an example is if you were in a car accident and you got hurt, if you had insurance then the insurance company would pay the damages to the car.

2. What is the difference between public and private insurance? Explain
The difference is that private insurance is private to you only and public is the type when anyone can get it. Another difference is that private insurance is more expensive then the public type of insurance.

3. How much do Americans spend on health care per year?

Americans spend about 2.5 trillion dollars per year on health care.

4. Who pays for health care in the United States? Explain.

The people that need the health care are the ones who pay for it. In America it is different then in Canada because in Canada it is paid for by the government.

5. What changes would U.S. President Obama like to make to the American health care system? Explain.

The changes mr obama would make to the American healthcare system would be to make the healthcare system like the canadien system because

then it would mean that no matter if your rich or poor you can get free healthcare just like there already is in Canada. If he did that then he would have been stopping people from wasting there money on the healthcare and they could not worry about spending thousands of dollars for getting stitches or some other injury that in the united states you have to pay for.
